AUTHOR Sanchez, Jorge R.
TITLE The Issue of Transfer: Transfer Data from CPEC/UC/CSU & the Transfer Assembly. Student Equity Report #2.
INSTITUTION Coast Community Coll. District, Costa Mesa, CA. District Research Office.
PUB DATE Apr 94
NOTE 23p.; For a related document, see JC 940 312.
PUB TYPE Statistical Data (110)

EDRS PRICE MF01/PC01 Plus Postage.
DESCRIPTORS *College Transfer Students; Community Colleges; Educational Mobility; Enrollment Trends; *Ethnic Distribution; Ethnic Groups; Higher Education; *Outcomes of Education; State Colleges; State Universities; Two Year Colleges
IDENTIFIERS California (Orange County)

ABSTRACT

This report examines the flow of transfer students from Orange County community colleges to the University of California (UC), the California State University (CSU), and regionally accredited independent colleges as reported to the California Postsecondary Education Commission (CPEC) and the Center for the Study of Community Colleges (CSCC). Data for Coastline Community College, Golden West College, and Orange Coast College are provided. Included are tables on: (1) Race/Ethnic Distribution of Transfer Students to University of California System, Fall 1986 to Fall 1992; (2) Race/Ethnic Distribution of Transfer Student to the California State University System, Fall 1986 to Fall 1992; and (3) reports showing the transfer rates for the 1992-1994 entering and transferring cohorts. Also included in the report is a table showing the flow of transfer students to the UC, CSU, and regionally accredited independent colleges and universities, fall term and full year, 1983-84 through 1992-93 from Coast, Rancho Santiago, North Orange County and Saddleback Community College Districts. Notes:
This table combines upper and lower division transfer students to reflect the ethnicity of the fall transfer student population transferring to UC campuses from Coastline Community College.

This multi-year summary will enable the reader to identify trends in the student transfer population.

Data in this report are for students transferring from Coastline Community College who enrolled at a campus of the University of California in the fall and re-enrolled for the spring term. Data are for students admitted to a UC campus who completed the majority of their lower division course work at Coastline Community College as reported to CPEC.

Source: Center for the Study of Community College, UCLA; Transfer Assembly Project.

Since 1989 the Center for the Study of Community Colleges (CSCC) has worked on the Ford Foundation sponsored Transfer Assembly. Using a single consistent definition, CSCC calculates transfer rates for colleges nationwide.

The CSCC transfer rate is defined as "the number of students who enter a two-year college in a given year, who have no prior college experience, and who complete 12 college credit units within 4 years, divided into the number who take one or more classes at a public in-state university within four years."

These Spring 1990 data reflect the qualified transfer cohort and were match against UC & CSU data systems for in at least one UC/CSU class. The subsequent CSCC transfer rate was calculated from these figures.

For comparison purposes, applying the method statewide yielded an overall Transfer Rate of 20.8%. Nationwide the Transfer Rate was 23.4%. Clearly the CCCD colleges performed their transfer function at or above the expected rate.

Source: Center for the Study of Community College, UCLA; Transfer Assembly Project.

Since 1989 the Center for the Study of Community Colleges (CSCC) has worked on the Ford Foundation sponsored Transfer Assembly. Using a single consistent definition, CSCC calculates transfer rates for colleges nationwide.

The CSCC transfer rate is defined as "the number of students who enter a two-year college in a given year, who have no prior college experience, and who complete 12 college credit units within 4 years, divided into the number who take one or more classes at a public in-state university within four years."

These Spring 1991 data reflect the qualified transfer cohort and were match against UC & CSU data systems for in at least one UC/CSU class. The subsequent CSCC transfer rate will be calculated from these figures.

For comparison purposes, applying the method statewide yielded an overall Transfer Rate of 22.0%. Nationwide the Transfer Rate was 22.6%. Clearly the CCCD colleges performed their transfer function at or above the expected rate.

Notes:
This table combines upper and lower division transfer students to reflect the ethnicity of the fall transfer student population transferring to UC campuses from Orange Coast College.

This multi-year summary will enable the reader to identify trends in the student transfer population.

Data in this report are for students transferring from Orange Coast College who enrolled at a campus of the University of California in the fall and re-enrolled for the spring term. Data are for students admitted to a UC campus who completed the majority of their lower division course work at Orange Coast College as reported to CPEC.
